### **DETAILED ACTION**

- This action is responsive to the following communication: an Amendment filed on 7/24/07.

#### ***Election/Restrictions***

- This application is in condition for allowance except for the presence of claims 18-19 directed to species non-elected without traverse. Accordingly, claims 18-19 been cancelled. As the results, claims 1-20 are now canceled; claims 21-23 are now allowed, renumbered as claims 1-3.

#### ***Allowable Subject Matter***

- Claims 21-23 are allowable over prior art of record, renumbered as claims 1-3.

The following is an examiner's statement of reasons for allowance: The cited prior arts (US 6433882 to Mori et al and US 6359696 to Hori et al) of record teach a method of printing, but the cited prior arts of record fail to teach and/or suggest a spool file includes information for specifying the subfile and information for specifying the command file and does not include the subfile and the command file, wherein the command file which stores a group of commands which control a printer, including a cancel command to stop printing and to detect whether the command file specified by the information for specifying the command file stored in the spool file has been updated or not every time the subfile is read and in combinations of other features" as cited in independent claims 21-23 (renumbered as claims 1-3). The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in claims 21-23 (renumbered as claims 1-3).
